

Maths Year 5 Unit5 Week 3 (T5) Shape Week 3 - 2023-24 (14.5.24)

Work to Praise and Share

- Most of the class understood the difference between regular and irregular polygons
- Great measuring of polygons by Bethany, Corey, Albert, Toby T and Jack B
- All very good at identifying 3D shapes, with most being showing a goof grasp of faces, edges and vertices

Support Needed

- Most children found measuring accurately (with decimals eg 2.3cm) tricky, but their main struggle was putting the protractor in the correct starting position on the shape

Presentation Highlights

Basic Errors

- Phoebe - confusing edges with vertices sometimes
- Scarlett W, Mason, Lucy and Romeo - struggled with identifying features of the 3D shapes even with the dotted line drawn on to help them
