

## Maths Year 5 Unit5 Week 5 (T5) Position and Direction Week 2 - 2023-24 (12.6.24)

### Work to Praise and Share

- Most children very accurate when translating shapes or points using coordinates
- All fine with horizontal or vertical lines of symmetry
- Most were accurate at reflecting shapes using a mirror and/or the number of squares.

### Support Needed

- Scarlett W - seems to have given up easily when more than capable of doing the work
- 

### Presentation Highlights

- Emphasis needed for some on using a ruler to draw shapes as well as lines of symmetry

### Basic Errors

- More practise needed on whether to add or subtract to the coordinate based on the translation of, for example '3 squares to the left' or '10 squares down'
- More accuracy needed across the class when drawing diagonal lines of symmetry

### Next Lesson Steps
