

## Maths Year 5 Unit6 Week 4 (T6) Converting Units 1 - 2023-24 (9.7.24)

### Work to Praise and Share

- All ok with converting kg to g and km to m
- Mostly good at converting mm to m and ml to l and the inverse - becoming much better at using decimals in this context too eg  $6.1\text{m} = 6,100\text{mm}$
- Most ok with converting between mm, cm and m

### Support Needed

### Presentation Highlights

### Basic Errors

- More practise needed with word problems, especially those that involve linking prices with different weights
- Some becoming confused with when to multiply by 10,100 and 1,000

### Next Lesson Steps
