

Maths Year 5 Unit1 Place Value 2 - 2024-25 (17.9.24)

Work to Praise and Share

- Although having to write the numbers in words and numerals slowed some children down, most were good at this
- Great work on reading and writing numbers from Albie
- River, Albie and Sam showed great understanding of using 'Powers of 10' and understood what happens when you multiply by 10 or 100
- Class generally quicker at working through questions - more now reaching questions 4/5/6
- All seemed to understand the partitioning aspects of a Gattegno Chart

Presentation Highlights

- Most of the class (all children that were middle set last year) understood partitioning and can partition accurately
- More consistency and reminders still needed, Poppy, Thea, Skyla, Cian and Keegan benefited from their pre-teaching intervention before the lesson.

Support Needed

- Isabella needs to check she has counted the counters in the place value chart accurately
- Poppy C and Skyla struggled with the 'how many tens/hundreds are in...' questions.

Basic Errors

- More practice needed on the idea of 'times by 10, add one more 0 to your answer, times by 100, add 2 more 0s to your answer etc'
- Most need help when asked to 'estimate where a number goes/put the arrow on...' using a blank number line.
