

Maths Year 5 Unit1 Addition and Subtraction 1 - 2024-25 (7.10.24)

Work to Praise and Share

- Pretty much all of the children very good at column addition and demonstrated a good understanding of column subtraction

Support Needed

- Millie-Anna and Araya struggling to add the numbers even when they are in a column
- Theo, Oscar, Araya and Mata found it hard to exchange and borrow

Presentation Highlights

- Setting out mostly good - some of the best so far this year!

Basic Errors

- More children need to use the column method when stuck
- Some children carrying the '1' accurately but forgetting to actually add it

Next Lesson Steps

- Extra emphasis on remembering to add the '1' that has been carried over
- More consistency needed with knowing when, and how to use, the '1' they have exchanged
- Most, if not all, children, did not grasp the concept of rounding to check or estimate their answers
