

Maths Year 5 Unit1 Multiplication and Division A1 - 2024-25 (22.10.24)

Work to Praise and Share

- Most of the class have shown a good understanding of what multiples are and how to find them - times tables knowledge across the class is ok
- Most were able to spot the common multiples and understand what the term 'common' means in this context
- Freya, Isla, Jimmy and Alice very good with factors.

Support Needed

Presentation Highlights

Basic Errors

- errors here

Next Lesson Steps

- More practise needed when working out a 'digit sum.'
- Some middle ability children - Isabella, Jensen, Poppy, Keegan - work at far too slow a speed. Will set them a target question to reach going forward.
- Two lessons spent on factors. Children need to get used to writing the factors in order, starting from '1x...', then '2x...', etc
