

## Maths Year 5 Unit3 Multiplication and Division B Week 3 - 2024-25 (23.1.25)

### Work to Praise and Share

- Children - including lower middle ability - fine with dividing 2 or 3-digit numbers by 1-digit numbers using short division ('Bus Stop') method and could even call out mistakes made on the board.
- Majority also okay with finding remainders - Max and Jaxson very good.
- Problem solving using word problems - Max and Ben H good even with 2-step problems

### Support Needed

### Presentation Highlights

### Basic Errors

- Claudia - accurate up until the last digit of her working out (remainders)
- Skyla - verbally good, not as accurate when writing on paper (remainders)

### Next Lesson Steps

- Will use Big Maths sessions to practise word problem solving skills further. Some children can solve them but at a very slow pace, so more work on accuracy and speed needed.
