

Maths Year 5 Unit3 Week 4 (T3) Fractions B Week 2 - 2024-25 (28.2.25)

Work to Praise and Share

- All children very good at multiplying a unit fraction by a whole number to create proper and improper fractions.
- Some very good examples of multiplying a mixed number by a whole number and, if necessary, converting an improper mixed number into a proper one - notably from Lucas, Ben H, Olivia, Isabella, Poppy, Alice, Ivy, Jensen and Jaxson. The rest of the class (excluding Araya and Millie-Anna) could do the multiplying as long as they created a proper mixed number.

Presentation Highlights

Support Needed

- More practice needed when converting improper fractions into mixed numbers for Olivia, Max and Poppy (right numbers in the wrong place) as well as general practice for Caine, Keegan, Lucas, Theo, Claudia, Oscar, Millie-Anna and Araya.
