

Maths Year 5 Unit4 Decimals and percentages Week 2 - 2024-25 (3.4.25)

Work to Praise and Share

- Great work from the whole class on representing thousandths as fractions and decimals, which they followed up in the next lesson when placing thousandths (as well as ones, tenths and hundredths) into a place value chart.
- Majority of class very good at comparing different decimals (up to 3 decimal places), even remembering to include any 0s in their thinking. Outstanding members of the class were Lucas and Aniyah - very accurate and methodical when approaching the word-based questions.

Presentation Highlights

Support Needed

- Caine, Oscar, Millie-Anna and Araya needed lots of help with working out which decimals were represented by the base 10 blocks.
- Lyla was not very consistent when ordering some of her decimals - concentration rather than ability issue.
- Araya, Millie-Anna and Mata needed lots of help.

Basic Errors

- More work needed on partitioning decimals.
