

Maths Year 5 Unit5 Shape Week 1 - 2024-25 (12.5.25)

Work to Praise and Share

- Whole class has shown a good understanding of degrees - full turn, half turn, quarter turn
- Class able to classify angles by stating if they are acute, right or obtuse and were then able to use this knowledge to estimate the size of angles with accuracy.
- Around half the class - including most of those from the pre-teaching intervention- could estimate and measure the size of angles mostly successfully

Support Needed

- Keegan, Caine, Theo, Ivy, Jensen, Oscar, Millie-Anna, Max, Araya, Olivia and Aniyah were not very accurate when measuring angles and/or reading from the correct scale on the protractor. Hopefully the next lesson on drawing lines and angles accurately will help.

Presentation Highlights

Basic Errors

- errors here

Next Lesson Steps

- More work on angles on a straight line, and how to use this to solve problems, needed by most of the class.
