

Maths Year 5 Unit6 Converting Units 1 - 2024-25 (19.6.25)

Work to Praise and Share

- Class are mostly fine with converting between kg and g as well as km to m if the amount is a whole number, with some able to do this with a decimal amount.
- Most of the class also fine with converting mm to m and ml to l as well as between mm, cm and m

Support Needed

- Millie-Anna, Oscar, Lyla, Elsie and Mata not very through or consistent with their converting between mm, cm and m. Millie-Anna in particular did not get very far.

Presentation Highlights

Basic Errors

- A few children need to remember to write the unit of measurement at the end of their numbers.
- Some more practise needed when using decimal amounts eg 23.5kg is 23,500g
